

ROUND 1 INTERVIEW: KYLE STANLEY
November 17, 2016

Q. Kyle, beautiful day, beautiful scorecard. Your thoughts on today, man?

KYLE STANLEY: Thank you. Yeah, really happy with that. Scoring-wise, you probably couldn't have asked for better conditions. The Plantation course played pretty soft green-wise and not a whole lot of wind, so pretty ideal day for some low scores.

Q. Now, our crew's been kind of debating, would you rather have the Seaside or the Plantation course on a day like today?

KYLE STANLEY: Oh, boy, I'm not sure it really matters. You're going to have to play them both at some point. I'm not sure what the wind was like over there. Overall, I don't really have a preference.

Q. And the game's been trending in the right direction. Any secrets?

KYLE STANLEY: Yeah, no, it has. Not really. I just feel like maybe, you know, sometimes your work doesn't pay off as soon as you would like it to. Obviously I had a stretch there where I wasn't playing very well but kept working. I seem to be kind of on my way out of that, so overall really happy with how I'm doing.

Q. 7 under to start the tournament at the Plantation course. Just a continuation of this good run you're on.

KYLE STANLEY: Yeah. In fact, I've definitely been playing a little bit better. Scoring-wise, pretty ideal conditions, not much wind, soft greens, but overall pretty happy with the day.

Q. What was the moment for you, because obviously when you came out, you won and everyone got excited about Kyle Stanley and then you had a lull. You're resurging again. What was the turning point to you getting it back on the right path?

KYLE STANLEY: You know, over your career it's kind of a given you're going to have some low points, or some highs and lows. Either way, you've just got to I think commit to working. I've done that and I kind of feel like I'm on my way out of it, which is nice. When the confidence goes, it just takes some time to get it back. Starting to feel a lot better, maybe feeling a little bit like my old self again on the golf course, which is really positive.
