

ROUND 2 INTERVIEW
March 30, 2018

IAN POULTER (-7)

IAN POULTER: Attitude, patience, and obviously rolled the ball really nicely today. Yesterday was a frustrating day on the golf course, didn't really get anything going when it was flat calm conditions. And then obviously today contrast, we had a completely different wind to what we had yesterday and I rolled the ball real nice. I mean, I started to hole a few putts. I rolled a 30-footer, 25-footer, 18-footer, 15-footer. So when you're doing that and hitting good shots to take advantage of a couple par 5s then without any mistakes, you can actually post a decent out here. 64's a good number, back in the mix and hopefully I have a really good weekend.

Q. You mentioned the change in attitude from yesterday to today. What does that do for the attitude heading into the weekend?

IAN POULTER: I'm going to have no expectations going into the weekend. I'm just going to go play golf, try to have a bit of fun. This game is frustrating at times, but rounds like that certainly help out. I think just go and try to enjoy myself, try to play the way I've been playing but see the ball going in. I did that well today, visual on the greens was good. We'll see how we go.

Q. Nice to have the game coming together now?

IAN POULTER: Game's been in shape for a while, I feel really comfortable how I'm playing. I'm putting the ball in play, I'm hitting a lot of greens in regulation, giving myself looks. Needing to convert putts, today was one of those days where I needed to and it's obviously nice to do that.

Q. And still that last spot for the Masters up for grabs and you're looking to still be in with a shout if you play like that over the weekend?

IAN POULTER: I'm not thinking about it, I'm not thinking about it, I'm not even talking about it now. Yesterday was -- I was angry yesterday, felt I took myself out of the golf tournament. Obviously I put myself back in it today with a good round. I'm going to need another couple of good rounds, but we'll see how we go. It's easier to go that way around than keep talking about it. Obviously I would like to make it, so let's see how we go.
